

## Household Hazardous Waste Disposal

Some items used around the house are considered Household Hazardous Waste. Care is advised when disposing of Household Hazardous Waste. Some items requiring special disposal are:

- Paint thinner
- Paint stripper
- Adhesives, mastics, and other home improvement products
- Herbicides
- Pesticides
- Fertilizers
- Some lawn and garden products
- Anti-freeze and coolants
- Gasoline
- Pool chemicals
- Aerosols – such as spray paints
- Oil-based paints and stains
- Thermostats
- Thermometers
- Fluorescent and compact fluorescent light bulbs

These items **cannot** be discarded in your regular trash and **cannot** be accepted at our local Public Works.

Each year, the Tullahoma Public Works Department joins forces with the Manchester Public Works Department, Coffee Co. Solid Waste and the Tennessee Department of Environment & Conservation to facilitate the Household Hazardous Waste Collection Event.

This Saturday, **April 21, 2012** Household Hazardous Waste will be collected at the Coffee County Solid Waste facility, 2180 Murfreesboro Highway, Manchester, Tennessee 37355 from **8:00 a.m. – 1:00 p.m.**

Please take the time to gather and dispose of all your personal Household Hazardous Waste during this event. Please note, the following items **will not** be accepted: smoke detectors, explosives, radioactive materials, empty containers or medical waste. No school, governmental agency, commercial enterprise or business waste will be accepted. This event is for **Household** Hazardous Waste.

For businesses, Tullahoma Public Works has information on how to recycle fluorescent bulbs and other items. For more information on this and other area recycling and disposal programs, contact Tullahoma Public Works at 931-454-1768.
